ISO 3744:2010-10 (E)

Acoustics - Determination of sound power levels and sound energy levels of noise sources using sound pressure - Engineering methods for an essentially free field over a reflecting plane

Contents

Foreword ................................................................. iv
Introduction ................................................................. v
1 Scope .............................................................................. 1
2 Normative references ........................................................ 2
3 Terms and definitions ...................................................... 2
4 Test environment .............................................................. 8
5 Instrumentation ............................................................... 11
6 Definition, location, installation, and operation of noise source under test .......................... 12
7 Reference box and measurement surface ........................................ 14
8 Determination of sound power levels and sound energy levels ................................. 18
9 Measurement uncertainty ...................................................... 26
10 Information to be recorded .................................................... 29
11 Test report ................................................................. 31
Annex A (normative) Qualification procedures for the acoustic environment .................. 32
Annex B (normative) Microphone arrays on a hemispherical measurement surface .................. 37
Annex C (normative) Microphone arrays on a parallelepiped measurement surface ................. 44
Annex D (informative) Microphone arrays on a cylindrical measurement surface ................... 55
Annex E (normative) Calculation of A-weighted sound power levels and A-weighted sound energy levels from frequency band levels .......................................................... 59
Annex F (normative) Alternative microphone array on a hemispherical measurement surface for direct measurements of A-weighted sound pressure levels ........................................ 61
Annex G (normative) Sound power level and sound energy level under reference meteorological conditions .......................................................... 64
Annex H (informative) Guidelines on the development of information on measurement uncertainty 66
Bibliography ........................................................................ 77
