

ISO 9612:2009-04 (E)

Acoustics - Determination of occupational noise exposure - Engineering method

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols	4
5	Instrumentation	5
6	Methodology -- Chronological steps	6
7	Work analysis	7
8	Selection of measurement strategies	8
9	Strategy 1 -- Task-based measurement	9
10	Strategy 2 -- Job-based measurement	12
11	Strategy 3 -- Full-day measurement	14
12	Measurements	15
13	Sources of uncertainty	17
14	Calculation of measurement uncertainties and presentation of the final results	19
15	Information to be reported	19
Annex A (informative) Example of a checklist to ensure that significant noise events are detected during the work analysis		21
Annex B (informative) Guide to the selection of measurement strategy		22
Annex C (normative) Evaluation of measurement uncertainties		25
Annex D (informative) An example showing calculation of daily noise exposure level using task-based measurements		33
Annex E (informative) An example showing calculation of daily noise exposure level using job-based measurements		37
Annex F (informative) Sample calculation of daily noise exposure level using full-day measurements		40
Bibliography		43
